PROFILE

Highly skilled Golang developer with a proven track record of developing, and deploying scalable, high-performance backend applications. Expertise in building microservices architectures and RESTful APIs. Passionate about creating maintainable, well-documented code that adheres to best practices

PROJECTS

Project1 – Backend-E-Commerce Project

AWS ‖ GitHub

I successfully developed a comprehensive e-commerce website for selling shoes as my first project. The platform encompasses full functionality. It providing users with a streamlined and efficient online shopping experience.

- Implemented JWT authentication and authorization.
- Utilized PostgreSQL as the database.
- Developed RESTful APIs with the Gin framework
- Containerized the application using Docker
- Deployed on an AWS EC2 instance.

Project2 – Microservice Application

AWS ‖ GitHub

I developed a microservices-based application, where a single codebase is split into different projects and connected using gRPC (Google Remote Procedure Call) for efficient communication.

- Used PostgreSQL as database.
- JWT for authentication
- Connected using gRPC

Project3 – Recruitment Management system

AWS ‖ GitHub

Developed a backend server for a Recruitment Management System enabling user profile creation, resume uploads, job opening management by admins, and job applications, utilizing JWT for authentication and integrating with a third-party resume parsing API.

- Used PostgreSQL as database.
- JWT for authentication

LANGUAGES

- English
- Malayalam
- Hindi

MINI PROJECTS

Project1 – gRPC

GitHub

- Developed a robust microservices architecture using gRPC for efficient communication between the client and server
- Utilized the Gin framework to create a scalable and performant server, implementing CRUD operations for user data, using postgreSQL

SKILLS

Programming & Deployment

- Go
- PostgreSQL
- Docker
- DSA
- MongoDB
- Kubernetes
- Unit Testing
- C
- Micro Services

Networking & Services

- Git
- AWS
- RestAPI
- GitHub
- gRPC
- Postman
- CI/CD

EDUCATION

GoLang Developer
Brototype (2023 MAR – Present)

Bachelor of Computer Application
Bharathiar University Arts and Science College (2015 – 2018)
